Tonji University
Undergraduate Department of Architecture - Shanghai

Open to all

Lectures:

Every evening a lecture will be held at the ANS in relation to the theme of the workshop, with participant from Italy and Abroad.

Theme: UTOPIA in Montisola

From the book of **Utopia** by *Thomas More* in 1516 to our days we can trace the struggle of mankind to define a better living place. Social, economical and technological issues intermingle to determine a new way of existence. Today the main issue at stake is sustainability, in all fields.

We will address technological and social solutions to change the way of living in **Montisola**, the largest island on a lake in Europe.
