一、Course orientation and basic requirements 课程定位和基本要求

1. Course orientation 课程定位

Art Modeling 2 is a compulsory undergraduate public basic course offered primarily for students majoring in architecture, design, and fine arts.

Building on *Art Modeling 1*, this course further expounds the fundamental laws and forms of visual art, the concepts, and expressive methods of diverse artistic forms, as well as the approaches to creating visual artistic images with various materials. It constructs an interdisciplinary visual art cognition centered on “image–material–space” and provides essential education in artistic form and accomplishment for the cultivation of talents in fine arts and design disciplines. Adopting a basic teaching mode that integrates theory with practical operation, the course broadens students’ artistic horizons, enhances their aesthetic cognition and humanistic accomplishment, inspires creative thinking, and fosters their ability for artistic innovation and creation.

2. Course Requirements 课程教学目标

Course aim 1:

Master the basic principles and techniques of color modeling, proficiently use gouache, watercolor, and other color tools, and develop students' color expression skills and aesthetic judgment.

Course aim 2:

Understand the concepts and aesthetic features of imagistic, abstract and creative modeling; recognize the cultural differences between Eastern and Western art, and cultivate cross-cultural artistic cognition.

Course aim 3:

Grasp the application rules of image, material and space in artistic modeling, form an initial interdisciplinary artistic vision, and foster artistic innovation ability.

Course aim 4:

Master artistic modeling methods for expressing inner spirit; guide students to establish a positive outlook on life, sound personality and good moral attainments.

三、Ability and Personality Cultivation 课程“立德树人”内涵

Mastering the fundamental laws of visual art and artistic expression techniques constitutes the core content of art teaching. Cultivating strong artistic expression ability and aesthetic accomplishment requires diligent effort; it is an indispensable stage in every student's artistic growth and a process that hones their will and perseverance.

This course undertakes the cultural responsibility of inheriting and carrying forward the excellent artistic traditions of the Chinese nation. A cultural perspective in art teaching is the key to cultural inheritance and innovation. We should not only guide students to recognize the fine artistic traditions of the Chinese nation but also broaden their international horizons, immerse them in the contemporary artistic context, and enable Chinese culture to face the future and keep pace with the times.

The core of art teaching is educating people. This course not only inspires students to discover their self-worth but also undertakes the task of guiding them to establish a positive life attitude, encouraging them to pursue kindness and beauty, hold firm beliefs and hope, and forge ahead steadily and far. Art teaching bears the important social responsibility of fostering students' patriotism and national

sentiment. Integrating with teaching design, we encourage students to apply the learned artistic modeling techniques to fully express ideological and political themes, eulogize revolutionary predecessors, builders of the times and the new look of the motherland's development.
